## Service

Our service department installs the latest in automotive performance upgrades on Chevy, Ford, Mopar and a few other select models. We offer anything from forced induction systems, suspension, braking, transmissions, to any other component on the vehicle. With multiple work station it provides us with the ability to efficiently work on each individual project. We also offer custom tuning and programming. Our staff has a wide range of experience enabling us to improve the performance, handling, and drivability of your vehicle. We can turn a vision into reality with our ability to customize. We build custom roll-cages, turbo kits and do many types of custom fabrication. Customization is important to us because it allows our builds to be distinctive and specific to the customers needs

## VEHICLE STORAGE

With 30,000 sq/ft we are one of the largest speed shops in the country. That provides us with the unique ability to not only work on your vehicle but also provide you with on-site indoor vehicle storage. Our facility has 24 hour indoor/outdoor surveillance cameras and is the perfect place to safely store your vehicle indoors. Our monthly storage packages go from your basic storage to high level of monthly upkeep and care for your vehicle. Full exterior/interior details, monthly start to operating temps, trickle charging, re-fuel and full prep before pick up are just a few of the options you can select. Please call for availability as we only take a certain number of vehicles at a time.

As your hometown speed shop it is our goal to provide you with excellent customer service and top notch workmanship. We provide detailed quotes before any work is done and try to direct you in a way that will be the most efficient and reliable track to reach your personal goals for the vehicle. Your vehicle is just as important to us as it is to you which is why we keep all cars indoors, use protective film over paint and keep our facility as clean as possible. The vehicles we service range from daily drivers to weekend cars to classics. With on-site vehicle storage, dyno services, and a number of workstations we have you covered all under one roof. Whether you seek to maintain a classic or you have the need for speed we appreciate all of our customers and look forward to doing business with you. With 10 years of business our slogan still stands true: There is no such thing as too fast.

## DYNO

DBR High Performance is the hottest place in Tennessee to get your car dynoed. DBR offers dyno testing, custom tuning, and in-house dyno time rental so you can do your own tuning. Our Mainline Prohub 2000 Dyno allows us to accurately calibrate and dyno 2000+ hp. A hub dyno is very beneficial in the tuning process because there is no danger of the vehicle coming off the dyno. It also has no issues with tire spin which allows us to have very precise calibration, especially on big power cars.

## EVENTS

DBR High Performance is an avid sponsor of US43 Drag way in Ethridge, TN. We love ripping down the drag strip just as much as we love their burgers, so we are proud to support our local race track, and its many racers.
